

# TRUSS COVERS

Perfect for weddings, corporate events, product launches and sales meetings, these truss covers attach quickly and cleanly with either a hook & loop system which is sewn into the hem, or a regular zipper.

Truss covers are available to fit any size or length of truss.

## TRUSS COVERS

There are times when a piece of truss can be a decorative element, giving a raw metallic look to a stage design, but equally there are times when your truss is just structural and you really want it to disappear into the background - and not look like a piece of truss.

The Cosmic Truss range of patterned truss covers come in a variety of designs allowing you to disguise your truss as something else entirely.

Contemporary graphic designs, along with soft natural looking images are available to suit a variety of moods or events where they could be used.

Along with the patterned covers, we also have standard lycra covers in a variety of colors, and can offer screen printing to enforce company or product branding as part of a client presentation.
