impression[&] X4 L

The impression X4 L features 37 RGBW LED's and offers full pixel mapping for ultimate graphical effects. But it doesn't stop there, as the X4 L also offers a super fast 7:1 degree zoom from 7° to 50°; an indexing front accessory allowing for placement of beam shapers and similar options; smooth full range dimming with no color shift, all supported by the high output 15W LED sources that form the fixtures engine. To complement this great feature set, the impression X4 L also brings full range 16 bit pan and tilt movement, electronic strobe functionality, variable color temperature correction control, and very quiet operation, all in the sleek baseless design that has become a synonymous part of the GLP impression product range.
