

UBASE shown with 3 x UTORM50-B, 1 x UTOP-50-B,
2 x short stabilizers and 2 x long stabilizers

UBASE TOWER

The UBASE enables a new mobile solution using the UTORM system from GLP.

Perfect for sidelight needs or anywhere that lighting ladders need to be flexible and repositionable.

The UBASE solution allows automated and conventional lighting fixtures, or other equipment, to be rigged and maneuvered with ease.

UBASE is constructed from solid steel for strength and stability, incorporates carrying handles, and is predrilled to accept the standard UTORM50.

Stabilizer arms ensure rigidity and security.
