DATA SHEET
RGBW LED Puck

SCENEX LIGHTING

The versatility of the +80 CRI RGBW LEDs paired with the IP66 rating. Meaning the LED Pixel Puck will meet all your design needs both in and outdoor.
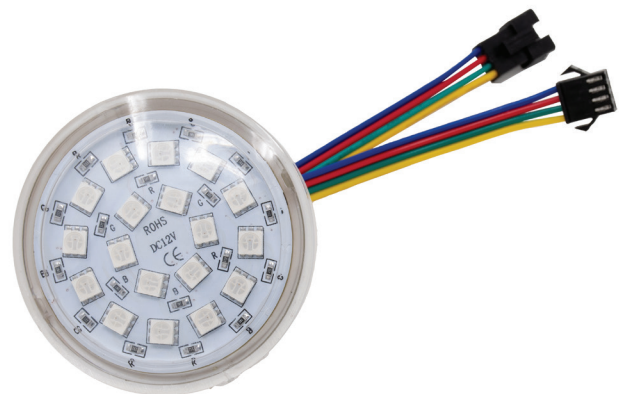

Scenex Lighting has its heart in creating beautiful scenic lighting elements. With its head in the practical solutions of taking these often delicate items into the real world of entertainment lighting applications.

From the toughest concert touring schedules to fast assembly items for quick change events, and the consistency of long running shows that need identical performance from the very first to the very last show, Scenex Lighting has it covered.

Our solutions comprise not just the lighting elements themselves but also the control systems. Making them work in a practical and affordable format. We back this up by years of experience and knowledge from our staff who are the heads behind developing so many of our products. If we've done it, then we know how to solve it, and we are happy to share our experience.

The full range of Scenex Lighting offers practical, affordable and reliable solutions to your LED set lighting needs.

We are happy to consult and advise on any system design featuring the Pixel Puck or any other Scenex Lighting product. Free of charge and without obligation, in order to help support and make your vision become a reality.
