LIGHTING

Scenex Lighting premieres a new range of flexible scenic LED solutions called Shadow Line. Incorporating a newly developed black housing for LED tape, the Shadow Line series appears completely invisible when turned off. The subtlety and innovation of the product design opens up a new world of creativity options for lighting, scenic, and production designers wanting to incorporate a clean and modern style, without the appearance of a dominant element when not being used.

Shadow Line series products come in a wide variety of LED options including single color, White variable, RGB and RGBW, with and without individual pixel control, in a variety of different voltage options to meet all project design needs.

Shadow Line

**sceneX**  
LIGHTING

## Light Source

**LED** 30/90, 60/80, 60/300 per meter  
**LED Colors** RGB, RGBW3K, RGBW4.2K, RGBW6.5K  
**Field Angle** 120°, 160°, 180°, 270°

## Operating Conditions

**Voltage** 5V, 12V, 24V  
**Outdoor Rating** IP65, IP 68  
**Max Temp.** 105°  
**Min Temp.** 13°

## Control

**DMX IC Chipsets** WS2811, WS2812, TM1814  
**Connector** 3 pin JST, 4 pin JST  
**Protocols** WS2811, WS2812, SK6812, WS2813, WS2812b

## Housing

**Color** black  
**Cutting** cut lines and marks after every pixel for custom lengths  
**Mounting** screw mount aluminum bracket  
**Length** custom length by DMX universe
